

Start here — your Novality crochet pack

TEST_STATUS: these patterns are drafted and arithmetically checked, not street-tested. If a round does not work in your yarn, that is on me — message the shop and I will fix the file.

Before you cast on (2 minutes, saves a whole re-do)

1. **Read the gauge block and hook it.** 5 cm square, counted, before you commit to 24 motifs. If your square is 3 stitches wide, go up a hook. If it is 15, go down. Do not "make the tension tighter" — the fabric will be board-stiff and the toy will not round out. 2. **Buy hooks by millimetres.** "Size 7" is 4.5 mm in the US and 3.0 mm on an old English hook. Every size complaint in this niche is that mix-up, not the pattern. 3. **US and UK terms are both printed in each file.** The abbreviation table is not decoration. 4. Mark your rounds with a safety pin or a scrap of contrast yarn. Multiplied rounds like (2 sc, inc) x6 are where an even row lost becomes visible three rounds late.

If a piece comes out wrong

- **Cupping or hexagonal edges** — you are decreasing at the end of a repeat instead of spreading them, or you joined mid-round where the pattern says continuous.
- **Too many stitches** — an inc you worked at the round start twice. Count at the end of every round for the first five rounds, then trust the pattern.
- **Fabric too small for the photo** — you used DK where it says worsted, not a smaller hook.
- **Name letters crooked** — work them before seaming, on the un-sewn leg, with the chart pinned beside you rather than open on a phone at 40% zoom. Print the chart page.

Licence, in plain words

Personal use, including gifts: make as many as your hands allow, gift them freely, post photos and tag the shop. What you cannot do: resell or share the PDFs, republish or translate them, sell finished items in quantity, or feed the files into a machine-learning dataset. Credit is welcome, never required, and never a substitute for asking when something is outside those lines.

One request

If a motif confused you, tell me which one and which round. A pattern file gets a version number at the bottom and the fix goes out to every buyer who already paid, which is the part of this business that turns a \$12 sale into a review.
